

Solar lighting,
designed to last

NOVEA

GROUPE RAGNI

FRENCH SPECIALIST OF AUTONOMOUS LIGHTING SOLUTIONS SINCE 2007

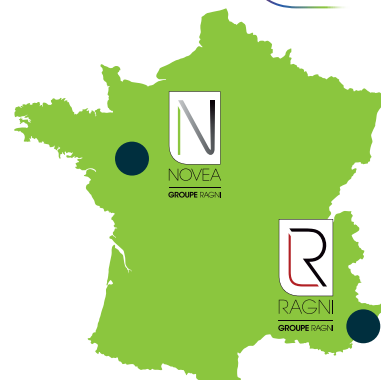

GROUPE
RAGNI

Leader in design and manufacturing of autonomous solar lighting systems

Precursor in France and Europe, we will spare no effort to provide qualitative products and unique support. Confident in our solutions, we offer the best lifespan and warranties of the market.

Subsidiary of RAGNI Group since 2015, we are able to use solar energy to power reliable luminaires.

With thousands of references around the world, we have a mastered know-how that we develop thanks to a network of partners present in each country.

SOLAR PUBLIC LIGHTING : A SUSTAINABLE SOLUTION

0€ of trenching and cabling costs

A preserved installation site and easy setting.

0€ of energy bill thanks to 0 kwh of consumption

Total independence from the electrical grid, energy savings with a very profitable solution thanks to the long lifecycle of the components.

+ 20 years of lifespan and 10 years of warranty

Best performance in the autonomous public lighting market.

A secure solution

Ideal for providing rapid security for isolated areas and sensitive sites.

A highlighted environmental process

Seen by everyone, this solar public lighting furniture will perfectly represent your sustainable development policy.

0g of CO₂ emissions

Reduced environmental impact, no use of fossil energy sources for operating, a preserved installation site and avoidance of light pollution (dimming mode, presence detection).

The largest range of products for a wide choice of applications

From isolated site to motorway interchange, from pedestrian crossing to car park, we offer different technical and aesthetic solutions to meet your lighting needs.

OUR PRODUCTS, DESIGNED TO LAST

Endurance+ battery

Battery and electronic device with unique performances.
Service life > 20 years
(8 000 cycles at 30 % of DoD at 25 °C)

Solar panel

High performance, self-cleaning, optimal tilt.
Service life > 25 years

LED luminaire

Very high performance: until 165lm/W, IP66 IK08.
2 200 K / 2 700 K / 3 000 K
Service life > 20 ans
Ragni range

Pole and bracket

Standard compliant with EN40 and Eurocode 1991-1-4 for all wind zone.
Service life > 30 years

Innovative functions

Communicating motion detection, bluetooth® and remote management.
